

The Department of Pharmacology & Toxicology at the University of Toronto is accepting applications for a tenure-stream faculty appointment at the rank of Assistant or Associate Professor. The appointment will begin January 1, 2016.

An appropriately qualified individual may also be nominated for a Tier 2 Canada Research Chair. For further information on these federally endowed chairs, open to all nationalities, see <http://www.chairs.gc.ca/>.

We are seeking an outstanding individual with the ability to develop an original, competitive and independently funded research program, and to contribute significantly to undergraduate, graduate and professional education in pharmacology. Our goal is to recruit an academic scientist with research expertise and excellent teaching abilities that align with one of the Department's central research themes. In particular, individuals with a specialization in neuropharmacology, molecular pharmacology or drug metabolism/toxicology are encouraged to apply, although we also invite submissions from highly qualified individuals with a broad range of research interests in pharmacology. Requirements include a PhD degree or equivalent in pharmacology or a closely related research discipline; significant post-doctoral experience; and an established record of research excellence including evidence of successful research funding, publications in leading journals, presentations at significant conferences, and evidence of superior future research plans; and evidence of excellence in teaching demonstrated by a strong teaching dossier, letters of reference and previous teaching experience. Salary and rank will be commensurate with qualifications and experience.

The University of Toronto, Canada's largest university, is also one of the world's top biomedical research environments, ranking first among North American public research universities in the number of research publications by its health scientists. A wealth of opportunities for basic, applied and clinical research collaborations are available with world-class scientists throughout the Faculties of Medicine, Pharmacy, Dentistry, Arts & Science and Engineering at the University, as well as with those at its many affiliated hospital-based research institutes. In addition, the city of Toronto is a vibrant, inviting, safe and multicultural environment in which to live and work.

All qualified candidates are invited to apply by clicking on the link below. Applications should include a cover letter, curriculum vitae including names and email addresses of three referees, a detailed teaching dossier (including a statement of teaching philosophy), and a statement outlining current and future research interests. If you have questions about this position, please contact elaine.jack@utoronto.ca. All application materials should be submitted online.

Submission guidelines can be found at: <http://uoft.me/how-to-apply>. Please submit attachments in PDF format only and label each file accordingly as cover letter, CV, or teaching dossier. The direct URL is:

<https://utoronto.taleo.net/careersection/10050/jobdetail.ftl?job=1500977>

Evaluation of applications will commence on September 14, 2015, however applications will be considered until the position is filled.

Applicants should arrange to have three letters of reference sent directly by email (on letterhead, signed and scanned) to elaine.jack@utoronto.ca by the closing date.

For more information about our department, please visit our home page at <http://www.pharmtox.utoronto.ca/home.htm>.

The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.

All candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.
